Speaker

Dr. Ravi Chellam

CEO of Metastring Foundation
and coordinator of the
Biodiversity Collaborative

Dr. Ravi Chellam is involved with the National Mission on Biodiversity and Human Well-Being. He will talk to us about his journey over several decades studying the ecology of lions, and how scientific evidence and understanding has helped him frame his engagement with the conservation of lions. He will also explain how the introduction of African cheetahs will impact the long delayed translocation and reintroduction of lions to Kuno.

**Join the IISER Tirupati - IIT Tirupati - KREA University
lecture**
